EDUCATION

2022 - 2027
INHOLLAND UNIVERSITY

- Bachelor of Applied Mathematics

SKILLS

- Programming:** Python, SQL, Pandas, NumPy
- Machine Learning & AI:** Tensorflow, YOLO, Deep Learning, Computer Vision, Scikit-learn, Predictive Modeling
- Data Analysis & Visualization:** PowerBI, Tableau, Matplotlib, Seaborn, EDA, Statistical Analysis, Excel, dashboards, stakeholder communication
- Other:** Git, Docker, Linux, Jupyter Notebook

LANGUAGES

- English (C1)
- Dutch (B1)

HOBBIES

- Homelabbing & Self-hosted Infrastructure
- Game Development
- Board Games
- Piano

PROFILE

Fourth-year Applied Mathematics student specializing in Data Science and Machine Learning, seeking a graduation internship. Hands-on experience in predictive modelling, computer vision, data analysis and AI-driven automation. Experienced with Python, SQL and Power BI, with practical experience developing and evaluating machine learning solutions for real-world applications. Analytical and curious, with a strong interest in turning complex data into actionable insights and developing data-driven solutions to real-world problems.

WORK EXPERIENCE

- Inholland**  February 2026 - June 2026
Computer Vision Intern
 - Developed and evaluated computer vision solutions for **automated garlic processing** and robotic agriculture.
 - Worked on image recognition and machine learning components of a robotic automation system.
 - Experimented with and evaluated solutions to address technical challenges in a real-world application.
 - Collaborated with research and industry teams to develop practical data-driven solutions.
- Inholland & Leads.io**  September 2025 - February 2026
Data Science
 - Developed a machine learning model to **predict next-day Cost Per Lead (CPL)** using historical **Meta advertising** campaign data.
 - Applied **time-series regression** and **predictive modelling** to support proactive budget decisions.
 - Created Power BI dashboards to communicate campaign insights and model results to stakeholders.
 - Analyzed model performance and translated results into actionable insights.
- JOZ BV**  October 2024 - March 2025
Data Analyst Intern
 - Analyzed robotic testing data to identify factors influencing **product performance and reliability**.
 - Applied Python-based data analysis and **predictive modeling** to support **data-driven maintenance** strategies.
 - Improved testing workflows through data-driven analysis, helping identify potential failures and improve testing workflows.
